### Key:

Above are the Minute values and Click values used for both Producers and Musicians for music year 2021. The difference between the Producers and Musicians rate relates to the SoCu deduction. The channel name followed by + shows the Minutes value from the allocated hospitality payment. Music used as design music is excluded from the allocated hospitality distribution. See also the cash flow statement: <https://sena.nl/nl/muziekgebruikers/van-incasso-naar-doorbetaling>.

The click unit is used as the calculation unit for background music suppliers. Where Minutes are specified, the actual minutes broadcast are used as the calculation unit. The regional channels are an amalgamation of all regional public broadcast (RPO) radio stations. DLG nieuwe Media (DOW) represents the playlist containing download data. This is used to allocate the online payments. □
